FOR PNU PI TO COMPLETE WITH COLLABORATOR
Describe Collaborator's Scope of Work/ Activities:

Proposed scope - draft, subject to PNU approval:
- BrainSAIT, a licensed health-tech incubator in Riyadh (licence 1170), runs a joint incubation programme with PNU for health-AI projects led by PNU researchers and students.
- Programme (12-18 months): scored admission; foundation, build and launch phases; mentoring; bilingual (Arabic/English) product engineering; FHIR R4 / NPHIES interoperability and compliance support.
- PNU role (proposed): refer and co-select projects; faculty sponsors; clinical and research input via the Clinical Skills & Simulation Center and computing/AI labs where agreed.
- Training: bootcamps for PNU faculty and students on health AI and interoperability.
- Data only under PNU ethics (IRB) approval; no patient data without approval.

Milestones / deliverables: signed MoU and joint workplan; selection call and first cohort; training programme; first-cohort review report.

IP: existing BrainSAIT products (BPR, Doctors' House) remain BrainSAIT property; ownership of incubated projects and joint outputs to be agreed in writing with the PNU IP unit before work begins.
